

APICS is the leading professional association for Supply Chain and Operations Management.

The APICS Albuquerque Chapter will host a WebEx seminar by speaker

Jonathan Todd

“Keys to Effective Global Logistics Outsourcing in 2020”

Enterprises with global supply chains know all too well the importance of quality transportation and logistics service, whether internally delivered or outsourced to third party providers. The wide range of interruptions, production delays, un-forecasted cost, and reputational damage that can result from unexpected events is tremendous. Today, an increasing number of stakeholders within organizations are tasked with the efficient and error free movement around the globe - including traffic and supply chain departments, procurement teams, risk management, accounting and legal. This session will explore current strategies and risk mitigation practices involved in the global sourcing and use of carriers of all modes, logistics services providers, and warehouses. Attendees will take away a clear picture of procurement trends for those services and emerging norms for minimizing exposure.

Thursday, March 12, 2020
12:00 noon – 1:00pm MST
Please RSVP by March 9th at
Contact@abqapics.org

Jonathan Todd is a Partner in the Transportation & Logistics Practice Group of the law firm Benesch. The practice was recently named by U.S. News & World Report as the “Law Firm of the Year” in transportation law for 2020. This is the fourth year that it has held that title.

APICS is the leading professional association for Supply Chain and Operations Management.

He serves clients in transportation, logistics, and related regulatory compliance matters. Today's global supply chains are increasingly the measure of enterprise value propositions and even competitive advantage. Jon's experience yields the vision, dynamic thinking, and pragmatic problem solving that are keys to winning in this economic environment. He demonstrates the command of operational best practices, regulatory requirements, and savvy toward risk tolerances that his clients demand from themselves and their leadership – because the stakes are high.

Fluently speaking the language of global supply chain management makes Jon effective. He understands the players and bottom line business impact because he has been there. Prior to private practice he was Senior Corporate Counsel for a global transportation and logistics provider with operations in North America, Western Europe, and Asia Pacific. He was close to the business as an officer of the international logistics subsidiaries performing freight forwarding, NVOCC, indirect air carrier, and customs brokerage operations, and was instrumental in the day-to-day legal issues of the company's large motor carriers.

Jon's expertise in all aspects of the supply chain has proven valuable to both industry at large and to government agencies. The U.S. Transportation Secretary appointed him to a Federal Motor Carrier Safety Administration (FMCSA) advisory committee. The TSA Administrator appointed him to the Surface Transportation Security Advisory Committee. The U.S. Commerce Secretary has appointed him to a District Export Council. The Ohio Governor appointed him to the Executive Order of the Ohio Commodores. He is also a voting member of the American Trucking Association's Supply Chain Security Policy Committee and the Air Forwarders Association's Regulatory Compliance Committee.

Jonathan holds an Engineering degree from Iowa State University and an MBA-Operations Management from De Paul University.

EDUCATION

If you are interested in starting your CPIM or CSCP certification education, please send an email to contact@abqapics.org or call 505-331-8205

CPIM Certification

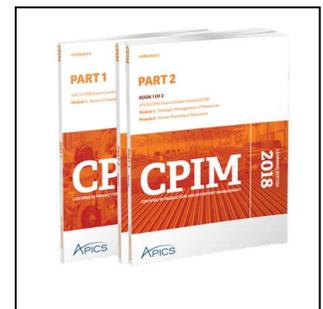

Acquire a working knowledge of the tools and techniques for planning of inventory, including planning techniques such as MRP, CRP, lean, TOC, and projects. Understand the effect of using each technique; know standard measurements for inventory, materials, capacity and supplier performance; and recognize when to escalate issues. Topics include:

- Managing inventory, planning material requirements, planning capacity requirements, and procurement and supplier planning
- Recognizing the importance of supply chain management and deploying supply chain strategies related to scheduling, planning, and sourcing
- Translating product-level plans and schedules generated at the master planning level into requirements that can be procured or produced
- Bridging the master planning area with the execution and control function
- Planning, scheduling, resource allocation, and implementing projects that are used to manage the supply of products and services 2017

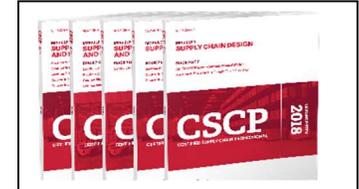

APICS CPIM provides

- Increased efficiency across organizational operations
- Understanding of production and inventory activities within the internal operations of a company
- In-depth view of materials management, master scheduling, production planning, forecasting and quality improvement within the confines of the operation.

CSCP Certification

What is the APICS CSCP Program?

- Professional development, education and certification program
- First certification program to focus on the end-to-end global supply chain
- The global standard in supply chain education and certification since its introduction in 2006

Benefits of APICS CSCP Education

- This world-renowned program benefits professionals and employers by
- aligning global supply chain strategies with business objectives to streamline operations and drive profits
- helping professionals gain knowledge and practical applications to effectively manage global supply chain activities
- demonstrating mastery of the concepts that create consistency and foster collaboration through best practices, common terminology and corporate wide communication
- increasing employee on-the-job confidence
- enhancing credibility throughout the industry

What Can the APICS CSCP Program Do for Employees?

- **Expertise in supply chain management** areas that are broader than the normal scope
- One **comprehensive source** of reference material that is unbiased by special interests of consultants
- Stay **up-to-date** on advances and evolution of knowledge in this field with conferences, publications
- Gain a **network of contacts** from different industries who have all also completed the APICS CSCP program
